

Mather High School ADA Renovation

Stephen T. Mather High School 5835 North Lincoln Avenue, Chicago, Illinois

The Structural Group, Ltd. provided structural engineering services for the renovation work required to bring the school into compliance with the Americans with Disabilities Act (ADA). This work included the addition of new elevators, wheel chair lifts, ramps and access hallways. The modifications required coordination with multiple structural systems and with diverse existing conditions. TSG's work allowed the architect to provide creative solutions to difficult logistical problems. The Mather High School renovation is an example of the diverse educational work that The Structural Group, Ltd. has performed from renovation to new construction; such as the new 67,000 square foot White Pines Academy of Lemont, Illinois, a private elementary school.

Architect: Macondo Corp.
