

Victory Centre Independent/Supportive Living Facility

Victory Centre Independent/Supportive Living Facility, Park Forest, Illinois

Over 100,000 square feet facility composed of one four-story independent living facility and with one three story supportive living facility. The Independent Living building plan is a set of wings arranged in a C-shape with the wings radiating from rotating cores. The central wing public spaces and lobby are created by steel transfer girders supporting upper level bearing walls above the first floor.

The Supportive Living building plan is composed of three wings radiating from a central core. One wing contains a relatively open plan cafeteria with load bearing walls above eliminated at the first floor by means of transfer girders above the first floor.

Architect: Nadel Architects Inc. and Marvin Fitch
